New CDC Report Denies Link Between COVID Shots and Sudden Deaths in Young Adults

Critics said the researchers looked only at data in one state, limited the study period to 100 days post-injection and failed to use appropriate search terms for finding possible cases of cardiac death related to COVID-19 vaccination.

By Suzanne Burdick, Ph.D.

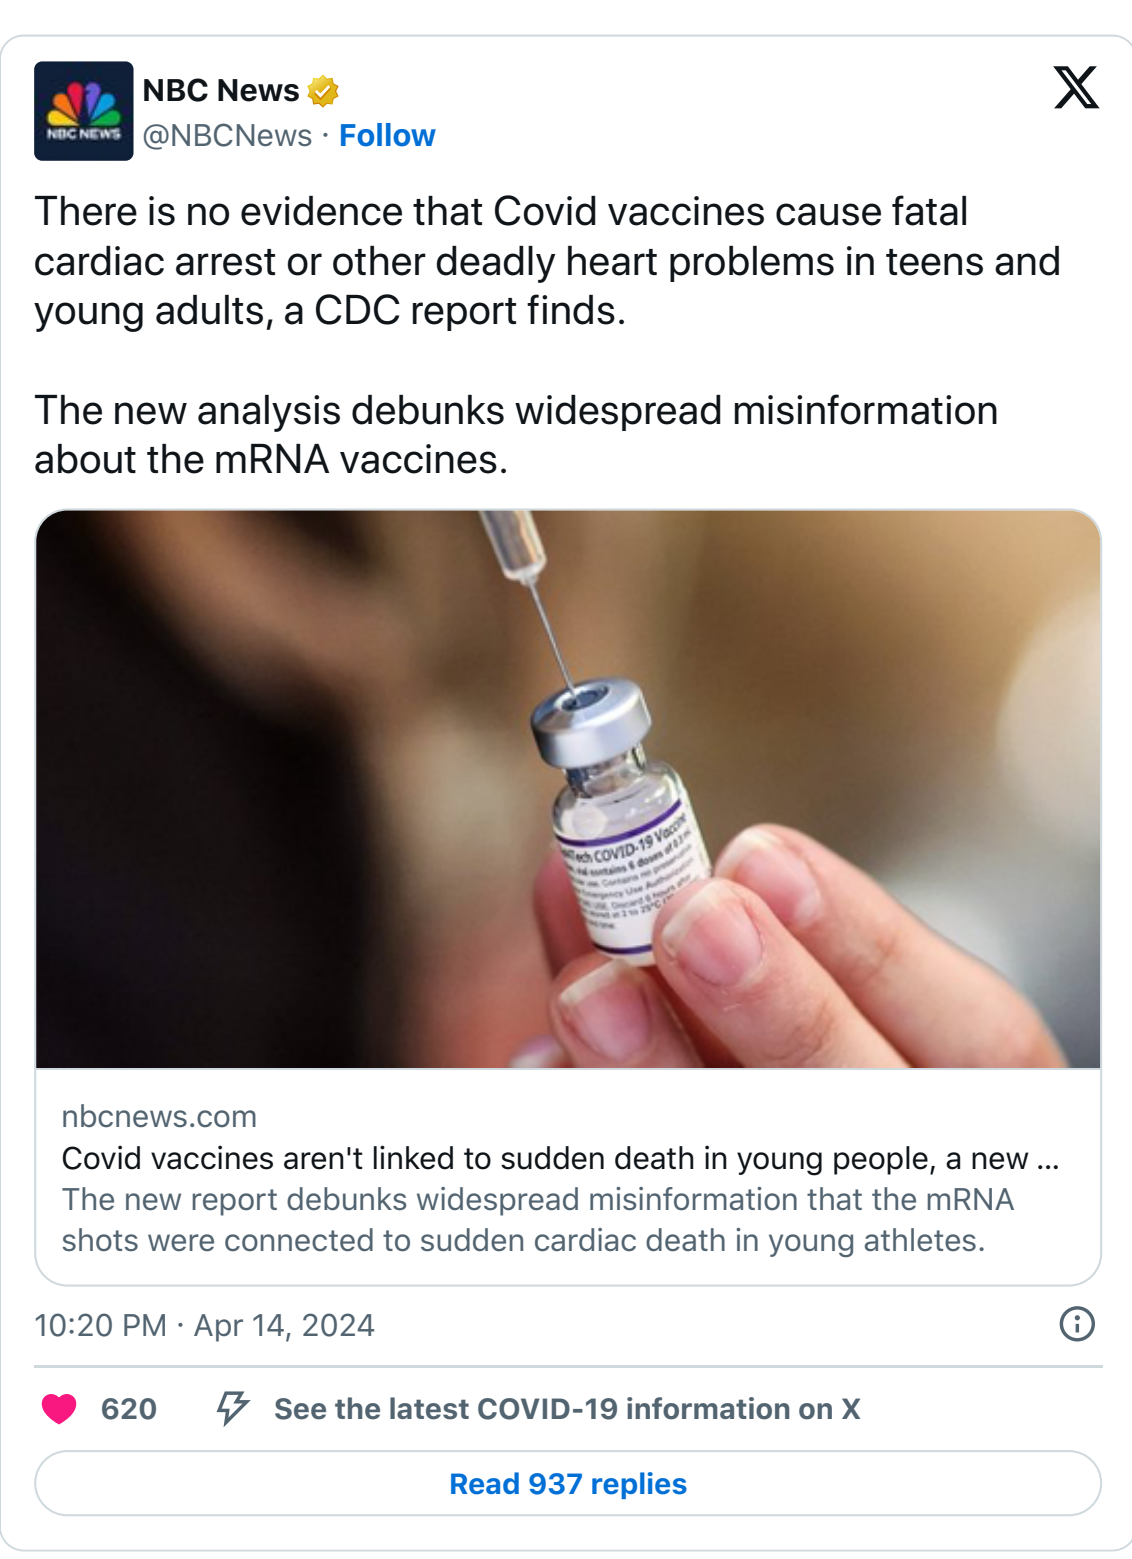
The Centers for Disease Control and Prevention (CDC) on April 11 released a new study claiming the findings showed no link between COVID-19 vaccination and sudden cardiac death in young people.

Mainstream news outlets, including NBC and Forbes, picked up on the CDC's analysis, erroneously reporting that it showed there is "no evidence" that COVID-19 vaccines are linked to fatal heart problems in young people.



NBC News

There is no evidence that Covid vaccines cause fatal cardiac arrest or other deadly heart problems in teens and young adults, a CDC report finds.

The new analysis debunks widespread misinformation about the mRNA vaccines.

Meanwhile, critics — including Brian Hooker, Ph.D., Children's Health Defense (CHD) chief scientific officer, and Dr. Peter McCullough, a cardiologist — said the CDC's study was flawed, and that its authors failed to mention many prior studies documenting a link between COVID-19 vaccination and cardiac problems.

"This study disproves nothing," Hooker told The Defender. "There are myriad studies showing the link between COVID-19 vaccination and cardiac sequelae — this is just CDC's Band-Aid to cover all of the good science with a poorly thought out and deceptive study."

McCullough told The Defender, "As a cardiologist, I do not find this study reassuring."

Numerous X, formerly Twitter, users ridiculed the CDC report and NBC's coverage of it. Shenandoah Writer, a legal analyst and educator, tweeted:

Study counts only 3 deaths in vaccinated, says none caused by vaccine

The study — published in the CDC's Morbidity and Mortality Weekly Report (MMWR) — came from Oregon public health authorities' analysis of roughly 1,300 death certificates of Oregon residents ages 16-30 who died from a heart condition or unknown reasons between June 1, 2021, and Dec. 31, 2022.

According to the CDC, MMWR is often called "the voice of CDC" and is the agency's "primary vehicle for scientific publication of timely, reliable, authoritative, accurate, objective, and useful public health information and recommendations."

Forty deaths occurred among people who received a COVID-19 mRNA vaccine and only three occurred within 100 days after vaccination, the authors said.

The authors examined the death certificate data to determine what coroners listed as the cause(s) of death.

Of the three deaths that occurred within 100 days of COVID-19 vaccination, two were attributed to chronic underlying conditions. The cause of death for the third was undetermined, they said.

Meanwhile, they said 30 deaths were attributed to COVID-19 infection.

"These data do not support an association between receipt of mRNA COVID-19 vaccine and sudden cardiac death among previously healthy young persons," they wrote in their report, adding that "COVID-19 vaccination is recommended for all persons aged ≥6 months to prevent COVID-19 and complications, including death."

Multiple flaws underreport fatal cardiac events in the vaccinated

Hooker and McCullough described multiple flaws in the study authors' methodology.

For example, the authors should have looked at the death certificate data for people who died more than 100 days after they got a COVID-19 shot — a limitation the study's authors also acknowledged.

"One simply cannot rule out cardiac deaths that occur over 100 days since vaccine administration," Hooker said, "Underlying issues caused by COVID-19 vaccination could cause cardiac deaths after the 100-day cut-off that the study authors arbitrarily chose."

McCullough agreed. "We are seeing deaths occur after vaccines due to inferred, accumulating spike protein and myocarditis long after 100 days."

The authors of the CDC report also overlooked the fact that coroners hesitated to note anything about vaccination on the death certificates, Hooker said. So it's not surprising they didn't find death certificate records showing COVID-19 vaccination contributed to the person's death.

Again, McCullough agreed. "Medical examiners and attending physicians do not link drugs or vaccines to death certificates in routine practice."

Meanwhile, coroners commonly listed COVID-19 as a cause of death, so it's not surprising that 30 of the death certificates attributed death to getting the virus.

"In other words," Hooker said, the CDC is "grossly undercounting the rate of cardiac death after vaccination, which — based on its own numbers — eclipses the number of COVID-19 deaths reported in Oregon during the same time period. This would be a joke if it wasn't such a tragic lie."

The authors also did no comparison of the incidence of cardiac death before and after the rollout of the vaccine, Hooker added.

"The Wuhan Cover-Up"
by Robert F. Kennedy Jr.
ORDER NOW

Researchers left out key search terms for cardiac events

McCullough said many cases of cardiac arrest in vaccinated individuals are attributed to "coronary artery disease" or "heart disease" — yet "these were terms left out of the analysis."

McCullough called the study "underpowered," meaning it didn't look at a large enough sample size to accurately detect cases of fatal myocarditis in the general population.

"This flawed death certificate study does not reassure the broad medical practice community or the large population of vaccinated who are getting more jittery by the day as sudden deaths occur years after the last injection," McCullough said.

He offered this advice to the CDC if the agency wants to report accurate numbers:

> "The CDC should merge the vaccine administration data with the national death index, and not put any filters on the analysis so researchers can then begin the process of clinical adjudication of COVID-19 vaccine deaths."

What about research showing link between COVID vaccines and fatal cardiac events?

The CDC report didn't cite the numerous studies linking COVID-19 vaccination and subsequent fatal myocarditis, Hooker and McCullough said.

Tracy Beth Høeg, M.D., Ph.D., pointed this out, too.

In an X post responding to NBC News' touting of the report, Høeg said the CDC and NBC News "seem oddly unaware" of a "better and larger" nationwide study done in Korea.

This large peer-reviewed study, published in the prestigious European Heart Journal, attributed 21 deaths in people under 45 to vaccine-related myocarditis — eight of which were sudden cardiac deaths.

And a recent peer-reviewed study showed the mortality rate from COVID-19 vaccine myocarditis is 2.9%, McCullough said.

Heather Ray, a science and research analyst with CHD, said she found it "heartbreaking" to see the CDC report "making its rounds in the mainstream media — while many ethical peer-reviewed independent studies that show an increase in cardiac-related injuries and deaths in adolescents and young adults have received zero media coverage."

"This gives the public a false sense of security and covers up the truth while our children and young adults are dying at an unprecedented rate," Ray told The Defender.

RFK Jr. and Brian Hooker's
New Book: "Vax-Unvax"
ORDER NOW

Authors have long history of receiving CDC money

Ray also noted the study authors — Drs. Juventila Liko and Paul Cieslak — have a long history of receiving CDC funding for their research.

According to the U.S. national research database PubMed Central, 47 of the 55 publications Cieslak co-authored were funded by the CDC. Similarly, the CDC funded 7 of the 9 studies in which Liko was an author.

Cieslak previously worked as an Epidemic Intelligence Service officer for the CDC's Foodborne and Diarrheal Diseases branch before joining the Oregon Health Authority.

The Defender asked the study authors why, in their report, they didn't mention Korea's nationwide study, which showed a clear link between COVID-19 vaccination and sudden cardiac deaths.

The Defender also asked what the authors would like to tell people who may distrust the CDC and thus suspect the CDC edited its report to befavorable to the CDC's promotion of COVID-19 vaccines.

The authors did not respond by our publication deadline.

"CDC is a Private Organization – Not Government! "
Some people have questioned my concern over both the CDC and John Hopkins University is a PRIVATE organization where the CDC accepts private funding – NOT ONLY GOVERNMENT! The CDC is quasi-government under the Department of Health and Human Services which strangely has sources of funding that are predicated on the fact that it also has a private 501(c)(3) public charity, like the Clinton Foundation. The CDC Foundation receives charitable contributions and philanthropic grants from individuals, foundations, corporations, universities, NGOs and other organizations to advance the work of the Centers for Disease Control and Prevention. This is NOT a government-funded organization. It is not exclusively a government-funded – very curious.

This is a clear case of "control the narrative." When you control the media it's a slam dunk. If they can get those who view the news media as gospel, they have a good percentage of the population under their control. That makes it much harder for those who are aware of what is really going on to thwart their efforts at deception.

The big question is: how do we change that?
12 0 Reply

Kim from Brooklyn → holisticpoet
8 days ago
At this point, I cannot believe anyone believes anything they see, hear or read in the media. The only way to get close to the truth is to take everything one sees, hears or reads, and twist and reverse it a few times. Maybe, just maybe, then we will have some semblance of the truth.

Frustrating isn't it?

If we let people live the lives they choose, many will destroy themselves. Many will survive and find ways to stay alive.

Most people use common sense...NOT
Most would choose the truth over a lie.....NOT
Most people are sane.....NOT

With this deck, we better learn quick how to play the game of strategy. I often wondered why so many spend all their time figuring out ways to destroy instead of build. :(

Absolutely EVERYTHING promoted by both the FDA and the CDC as COVID mitigation measures only made the Plandemic many times WORSE, caused it to become endemic instead of going away by early 2021 as it would otherwise have, and maimed and killed millions of Americans plus many millions more around the world by the WHO's lockstep response. And the deaths from the Bioweapon Shots will in all likelihood continue to add up as the heart damage, blood clots, amyloid clots, autoimmune damage, neurological damage, and Turbo cancers inexorably increase over the next several years. This was by far the largest attack ever perpetrated on the human race, by orders of magnitude, and the final death count could be in the BILLIONS! AND they want to KILL BILLIONS MORE with a plethora of NEW deadly modRNA injections 100% guaranteed to also cause the body to attack its own tissues and cause more "time-release" deaths!

Talk... talk, talk, talk so much that they can hear it from freaking Miami!! Talk so much that they don't wonder what we think! Talk so much that those who are idiots eventually wake up!! I still see people running around believing that mask will keep them safe!! I have 2 friends who recently (3 months ago) got the "update." BOTH of them have been ill ever since - with one of them almost dying of sepsis! Just don't be quiet... they will hear even if they don't like what we say. Neither of them are going to get any more...and one of them realizes that it was the jabs that caused the sepsis.

If the CDC, politicians, public health agencies, physicians, and hospitals, admitted that the shots that they declared to be "safe and effective", were shown to be just the opposite, as they have, they all would open themselves up to thousands of lawsuits. Of course they will deny any connection! They are all criminals! An 88 year old friend, who never had any health issues, after taking all the shots, now has 4 heart issues! Telling her and the rest of us that it's just coincidence is a bunch of hooey!! Every person who pushed the shots should be prosecuted and sent to prison! And in my opinion, that goes for all the shots on the childhood vaccination schedule!

I consider all of these studies that say that Covid shot is safe to be inaccurate/invalid. Why? Lack of complete data. We all know that only about 1 to 5% of side effects from immunizations are reported to the CDC/FDA. With this small percentage of the negative side effects of immunizations being reported that would make it impossible to do an accurate safety study on that particular immunization.

4 0 Reply

ello → KTW

and we know that even before the vaccine rollout, more than 98% of people got thru covid by GODS grace and their own immune systems effectiveness . so the "vaccine" was trying to work on only 2 percent of the population and failed miserably at the "safe and effective" narrative.

We all need to be aware that the CDC cannot be trusted. I've known 3 people personally who died after getting the jab -- one was 61, but the other two were 43 and 38 -- all men, the 43-year-old was my plumber who decided to get the jab because he was in so many homes and he thought he might be at risk for getting Covid, and died suddenly while working. The 38-year-old was my landscaper/tree trimmer who died in his sleep (another SADS case), as was the 61-year-old business acquaintance who'd just returned from a 3-day trade show -- he got vax'd so he could fly to trade shows! His was the first SADS I knew of.
Do not EVER trust what the CDC says!! This is a programmed plan to depopulate the world.

There is so much wrong with these study results that even I, not being a scientist or statistician, see it: just because the death certificate did not list vaccination, it assumes death was not vax-caused; it tries to show "100 days" as the magic cutoff for vax-related; CDC's "extensive quality-assurance review" (just watch any of their vax approval meetings to see what that means - they have approved without any data).

NBC can rest easy now about continuing to advertise Big Pharma.

First of all, once again, my thanks to CHD for having the moral courage and ethical integrity to bring this information to light. The CDC and other "health agencies" have no moral high ground from which to provide believable information or advice. A moral position is anathema to their mission of protecting profits over people, so until we put RFK Jr. into residence at 1600 Pennsylvania Ave, we must remain hyper-vigilant. Plainly CDC is a dangerous criminal enterprise - legal or not.

"Forty deaths occurred among people who received a COVID-19 mRNA vaccine and only three occurred within 100 days after vaccination, the authors said."

The actual number of deaths among people who took the Covid shot, is exponentially above 40 people. Excess deaths spiked in nursing homes shortly after the Covid shot rolled out to them, triggering the CDC's death safety signal, which they hid for 2 years.

1 0 Reply

r2bzjudge
7 days ago

NBC News: "The new analysis debunks widespread misinformation about the mRNA vaccines."

Obviously false. The analysis has been debunked by critics already. The CDC report is part of a cover-up. As mentioned above, the report cherry picked data. Steve Kirsch's carpet cleaner had a heart attack 2 minutes after the shot. Four of the five heart attack deaths in the Pfizer trial were in the vax wing. I recall a 15 year old boy in Northern California who was found dead after his second shot. Autopsy determined heart issue caused by vax. Body builder Doug Brignole died a week after a bivalent booster. The FDA is sitting on some number of autopsies performed on people who died after a Covid shot. They refuse to release the information.

Athletes started dropping on the field at an excess rate, after the Covid shots were rolled out. Excess mortality jumped 6 sigma, after the Covid shots were rolled out.
There was a spike in doctor deaths in Canada, after a round of boosters.

The CDC report wasn't looking for the truth, but a false narrative to sell to the public. That, and to deny claims of those who died or had heart injuries due to the Covid shots. Vaccine Court will deny claims based on the CDC's false call of nothing to see here.
